

AIR DUCT INSULATION SLEEVE

Technical Data

R-Value:
R-4.2, R-8.0

Vapor Barrier Permeance:
JA: 0.04 perm (2.3 ng / s.m².Pa)

Available Diameters:
3, 4, 5, 6, 7, 8, 10, 12 inches

Standard Lengths:
10 feet

The air duct insulation sleeves are designed as a ready to use, energy efficient insulation blanket specifically produced for circular air duct insulation. The insulation sleeves provide an excellent method to reduce heat loss and condensation build-up. Many local building codes now dictate that any warm air ducting passing through an open or unheated space must be insulated. The air duct insulation sleeves are suitable for use with heating, ventilation and air conditioning systems.

Construction Materials:

The air duct insulation sleeves are made of a thick glass fiber insulating blanket, jacketed by a fiberglass reinforced metalized vapor barrier.
